EMPOWERING EXPLORATION

A Campaign for the Arts at Tallahassee Community College
“This world needs more people with imagination, people who are creative, people who are innovative. At TCC, we produce graduates who are critical thinkers and problem-solvers. We produce talent.”

Dr. Jim Murdaugh
President, Tallahassee Community College
From the K-12 arena to our local universities, there is a gap - and we must work to ensure it is filled. Access to arts education shouldn’t slow down or even stop for those that are entering TCC’s doors. Our arts education programs should be an extension from our K-12 programs and a solid bridge to offerings at the university level.

The arts at TCC should offer something for every student, faculty and staff member, and for our community.

“Theatre is all I’ve ever lived for; I find myself when I’m on a stage. It is TCC that allows me a place of sanctuary, to do the thing I love the most.”

Desmond Maxwell
Student
“With art, you push boundaries. It is a form of expression that helps people put ideas out into the world. It illuminates themes and feelings that not only entertain audiences, but also makes the audience think. With each performance, I feel like I am contributing to something bigger than myself.”
