

Hello!

My name is Ali and I am scholarship recipient here at the University of Edinburgh. You will have first heard my story in your letter from the Principal.

I wanted to write to say a huge thank you for increasing your regular gift in support of scholarships. Your gift is life-changing.

This term I am working on my fourth year design project to produce jet fuel from industrial wastes. I am also looking forward to starting my summer placement at a pharmaceutical company. After my undergraduate degree, I hope to pursue a PhD in Norway. All these plans could only be contemplated because of your support.

Thank you again,

Ali Khan

4th Year Chemical Engineering Student  
University of Edinburgh

Hello!

My name is Ali and I am a scholarship recipient here at the University of Edinburgh. You will have first my story last year in your letter from the Principal.

I wanted to write to say a huge thank you for setting up a regular gift to support scholarships. Your gift is life-changing.

This term I am working on my fourth year design project to produce jet fuel from industrial wastes. I am also looking forward to starting my summer placement at a pharmaceutical company. After my undergraduate degree, I hope to pursue a PhD in Norway. All these plans could only be contemplated because of your support.
