

FALL 2024 MAGAZINE COVER CONCEPTS | THEME: GLIMMERS OF HOPE

Inspiration for concept

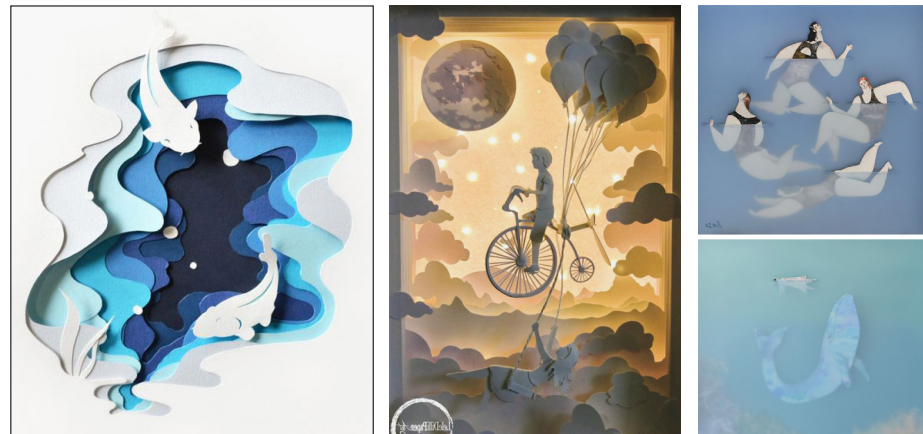

Ripple or Reverberating Effect of Hopeful Stories

In this issue, we present a collection of inspiring tales designed to uplift our readers. The accompanying illustration features a person rowing a boat, their strokes revealing the hidden beauty beneath the water's surface. This imagery embodies the idea that one individual's act of creating a hopeful moment can generate a profound effect, akin to how a single story of kindness can deeply influence and uplift those around them.

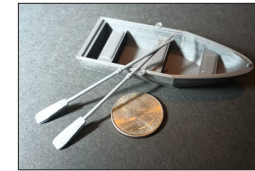

Construction of the cover artwork: The design team will handcraft the cover artwork using various paper types, including textured, translucent, colored, and shiny. We'll also experiment with lighting to illuminate the 'water' underneath, enhancing its visual effect for the final photograph. The photo will capture the artwork's intricate texture and depth, using lighting and shadows to bring it to life. Please refer to the inspirations below for a glimpse of what we envision for this paper art piece.

Materials

For the man in the rowboat, we will be purchasing HO- or O-scale models. The boat and person will be painted to add details for photography.

Paper and light sources—we will be exploring many types of paper materials to show the water texture. We will also explore different types of light sources for the photography.
