

## Welcome to the Neighborhood

A community that connects you to peers with similar goals, but who also broaden your horizons. A college experience that equips you to tackle *tomorrow's* challenges. This is what's possible in Mary Baldwin's Neighborhoods: our groups of career-focused majors where students, faculty, and real-world experiences converge. The result? Career preparation that transcends your major and a built-in network from day one. **Here, you'll find the support and opportunities to thrive in a field you love and launch the future you've always envisioned.**

**Here's how it works:**

- Choose the Neighborhood that resonates with you, your talents, and your career aspirations.
- Survey the majors in your Neighborhood during your first two years and see what clicks.
- Live in your Neighborhood's dedicated living space and discover direct pathways out to careers and graduate schools.

We've grouped our career-focused majors into four Neighborhoods to ensure your academic experience goes *beyond* your chosen major. Learning and collaborating with Neighborhood students from other disciplines gives you an interdisciplinary perspective that's enriching to you and highly valued by employers. Before your first day at MBU, you'll select the Neighborhood that matches your talents and interests. Once here, you'll quickly meet friends and mentors while enjoying shared experiences, meals, excursions, and events that immerse you in your field.
