Paolo Granata
A Guide to Surviving the Internet Age
The internet is a global habitat. It is the infrastructure of the human ecosystem. And therefore, argues Professor Granata, safety, privacy and openness on the internet must not be optional. In this session, the co-ordinator of the Book and Media Studies program at St. Michael's College will explore the ethics of this hyperconnected infrastructure and offer a practical guide for digital citizens who wish for a healthier internet.
Location: Sidney Smith Hall, 100 St. George Street

U of T: The Conscience of Artificial Intelligence

Location: Father Madden Hall, St. Michael's College, 100 St. Joseph Street

Saturday, June 2 3:45 p.m.

Fadi Masoud
Urban Planning for a Changing World
Zoning codes and urban standards usually assume a relatively static physical environment. But in the era of climate change, a new set of design and planning paradigms must accommodate uncertainty rather than try to eliminate it. Masoud, a professor of architecture, will demonstrate how in South Florida, the coastal city of the future must adapt to TerraSortaFirma, ground that is neither wet nor dry, but in a state of constant flux.
Location: Sidney Smith Hall, 100 St. George Street

Caolyn Harris
Raising a Royal Family
Royalty have always raised their children in the public eye and received praise or criticism according to the public standards of the day. Historian and royal expert Harris will show how the precedents set by past monarchs continue to influence royal parenting, as the present generation of royal parents balances tradition and modernity for their children in the 21st century.
