Platinum Category - Photography
Subcategory 2 - Excellence in Photography

“Jaren Wilkey – BYU Photo”

Village Drill - Engineering students assemble a portable village drill for a site test near BYU's campus. Their drills are sent to drill water wells for small villages in Africa. By putting the camera inside the drill's frame I was able to capture a unique perspective of the assembly process.

Splits-A member of the BYU Cougarettes does the splits in an underground walkway on campus.

Bushman- Freshman All-American Wide Receiver Matt Bushman pulls down a pass over a defender from Portland State.

Single Wide - Katy is played by Alyssa Aramaki Hazen in BYU's Production of "Single Wide". The star field was created by a gobo placed in front of a single stage light.

Data Centric- Statistical research graduate student DooHyun Kwon poses inside the supercomputer of the Talmage Building. This image was created with a combination of gelled lights in the background, a long exposure to bring out the ambient lighting of the servers and shutterdrag to convey a sense of movement.

Aspen Grove- A member of the Cougarettes dance team poses at Aspen Grove.

Tunnel - Members of the Football team enter the field from the visiting locker room at East Carolina State.

Ballroom - Members of the BYU Ballroom Dance Team showcase impeccable form during a traditional waltz.

Autonomous - Researchers in BYU's MAGICC Lab are developing autonomous drones that can inspect construction sites and tunnels. This image was captured inside a constructed tunnel with a slow shutter speed to help bring out the movement of the propellers.
