Welcome to the CASE Europe Annual Conference (CEAC), the leading event for professionals in education advancement in Europe.

This year’s topic is “Education: Disrupt or be Disrupted”. For the sector, disruption is a way of life. Societal and political turbulence is changing the way we are funded, regulated and perceived. In a time of constant change, how do we thrive and survive?

CEAC curates the knowledge, experience and expertise of those working in education. It is the perfect place to engage with professionals from higher education, schools, charities and arts & culture sectors from Europe and beyond.

Last year’s annual conference was held in Edinburgh and it was sold-out - our biggest in 25 years history. Building on this, we aim to give our partners the best opportunities to engage with delegates throughout the programme.

This year, there is no predefined support package. Instead you, have the chance to select the items and activities that are most interesting to you from a “shopping list” and prepare a bespoke package that, in your view, is the best way to achieve your goals to engage with prospective or existing customers.

This is just one of the changes we are proposing this year to make sure you have the best experience at CEAC. In fact, all the changes proposed are in response to your feedback from last year.

Join this incredible network of professionals from Europe and beyond to discover, learn, share and discuss the main topics on education advancement.

If you have any questions about the event, do get in touch! We very much look forward to seeing you in Birmingham this year!

Bruce Bernstein
Executive Director, CASE, London Office

SO, WHAT’S NEW AT CEAC 2019?

Most of the changes we are presenting for this year are a result of your comments and suggestions from last year’s conference. Our goal is to offer you a great experience in terms of meeting the right people and having fruitful discussions.

THESE ARE THE MAIN CHANGES

The Exhibition Hall
• Reimagined layout - all stands face the centre of the hall, offering the same exposure to everyone
• It will be like a “marketplace”, with activities being held there several times of the day
• Quick access to/from most of the session rooms
• An informal arena for talks - the “Storytelling Corner”

More delegate engaging opportunities
• Delegate engagement - with talks the “Storytelling corner” and showcase sessions

We are paper free - check our app!
• Instead of printed programmes, we are using technology. We launched our conference app last year - which had great feedback, so we are going paper-free! Check out these great stats showing the app usage:

933 Total user accounts
646 Users sharing profiles
122 Personal meetings
286 User-to-user messages
331 Exhibitor impressions
1,232 Hours of use

Format of support opportunities
• No predefined items, you are free to build your own package according to what is best for you

STORYTELLING CORNER
(TUE/WED/THU)
This space is sponsored by The Guardian and curated jointly with CASE.

This space is for informal discussions, focusing on alternative voices and innovative thinking. Book slots in our storytelling corner for a relaxed and informal discussion. This is a special space on the right side of the exhibition floor plan, with a maximum of 50 participants. Slots available are 30 minutes and will take place at certain times of the day, closer to the beginning and end of activities, when the flow in the exhibition hall is higher.

You will have a head microphone and 30 minutes to present something you believe is interesting for the audience you want to reach. It can be related to a current issue, or a skill you believe professionals should be focusing on, or even a life story that demonstrates the power of creativity. It is your choice! However, sales pitches would not be received well.
**Important deadline: 22 July.** Please send session titles and very creative descriptions, with author names, to Cristina Marochi cmarochi@case.org

EXTRAS

EXHIBITION STAND SPECIFICATIONS

Shell scheme – specification for exhibitors
Formula Shell Scheme is robust and well constructed, however, by its very nature an exhibition stand is a temporary structure and should always be regarded in this light.

We therefore offer the following information and guidelines to exhibitors in order to minimise misuse and obtain the maximum benefits from exhibiting your products in a Shell Scheme structure.

MATERIALS

Wall/partitioning panels and facia panels
Formula panels are manufactured with a 50mm timber frame and internal supports. The frame is clad on both sides with Class 1 Fire Rated 4mm plywood and is therefore generally hollow inside. The wall panels are then covered both sides with light grey Fire Retardant nylon loop material, using water based PVA glue. Facias are covered both sides in Blue Fire Retardant ‘Frontrunner’ material. Both are Velcro compatible.

Fixing brackets/support poles
All brackets used to construct the Shell Scheme are made from mild steel. Facia fixing brackets are covered in Blue Frontrunner fabric to match the facias, as are the facia support poles (25mm diameter flocoat tubing).
DIMENSIONS

Formula stock panels for walling and partitioning are either 1000mm or 500mm wide x 2440mm high. Occasionally if ceiling height dictates we have some stock panels at 2200mm or 2000mm high. Formula facia panels are 300mm deep and vary in length from 1000mm to a maximum 5000mm in 500mm increments.

CONSTRUCTION

Walling and partitioning panels are joined together with a metal bracket or ‘shoe’ which slots under the bottom joint and another over the top joint – this one is fixed in place through pre drilled holes. This produces a flush surface – no framework, no extrusions, gaps or overlays.

Formula panels can be used to construct stores/offices within your stand utilising our door panels. At extra cost we can re-cover your stand walls in a colour of choice.

Facias are joined to the panels using brackets, which are securely fixed to the panel first. There are also facia brackets which (a) join two facias in a span with a support pole where a span over 5000mm is required (b) join two facias at right angles on a corner with a support pole. Corners will be braced if necessary.

Fixing And Exhibiting

Nylon loop covered panels are suitable for displaying posters, foamex graphics panels, lightweight framed pictures, Perspex leaflet holders, drapes, cartons and lightweight merchandise using ‘hook ‘Velcro dots or tape.

Medium weight (max.2kg) light boxes or framed pictures can be hung on light chains secured into the top of the panel frame.

Lighting and hanging items required central to the stand must be fixed to battens as there is no ceiling grid – see order form.
Screws and nails must NOT be used into the face of the panels as they ruin the fabric finish and will not be effective because the panel face is only 4mm thick.

Heavy exhibits, sheet materials, stepladders and other heavy display equipment or stand interiors must NOT be fixed to or leaned against the Shell Scheme walls. REMEMBER this is a temporary structure not a permanent wall.

If producing full cover graphics panels to shell scheme walls please be aware that the back wall dimensions may be slightly less than the stand size due to side wall panel thickness- please call for advice on this. We can produce graphics for you from your artwork, fixed, ready for your arrival on site.
